journal of controlled release

OFFICIAL JOURNAL OF THE CONTROLLED RELEASE SOCIETY
AND THE JAPANESE SOCIETY OF DRUG DELIVERY SYSTEM

COVER STORY

The drug delivery field needs a well-diversified technology portfolio

journal of controlled release

Official Journal of the Controlled Release Society and of the Japanese Society of Drug Delivery System

The journal publishes innovative, original research involving the controlled release and delivery of drugs and other biologically active agents. The terms "controlled release" and "delivery" are used in their broadest sense to include mechanisms such as diffusion, chemical and enzymatic reactions, dissolution, osmosis, targeting, as well as the utilization and manipulation of biological processes. A broad spectrum of studies dealing with all aspects of controlled release and delivery, including gene delivery, tissue engineering and diagnostic agents, is encouraged. The use of prodrugs and carriers such as water-soluble polymers, micro and nanoparticles, liposomes and micelles is included in the scope.

In addition to original full length papers and reviews, the journal includes reports of future meetings and announcements pertaining to the activities of the Controlled Release Society. Persons considering writing a review are encouraged to contact the Review Editor.
