OFFICIAL JOURNAL OF THE CONTROLLED RELEASE SOCIETY  
AND THE JAPANESE SOCIETY OF DRUG DELIVERY SYSTEM

## COVER STORY

Attenuating the immunogenicity of PEGylated liposomes by gangliosides

# journal of controlled release

Official Journal of the Controlled Release Society and of the Japanese Society of Drug Delivery System

The *Journal of Controlled Release* (JCR) publishes high-quality research articles in the broad field of delivery science and technology. This includes drug delivery systems and all aspects of formulations, such as physicochemical and biological properties of drugs, design and characterization of dosage forms, release mechanisms, *in vivo* testing, and formulation research and development in the disciplines of pharmaceutical, diagnostic, agricultural, environmental, cosmetic, and food industries. Manuscripts that advance fundamental understanding of principles and/or demonstrate advantages of novel technologies in safety and efficacy over current clinical standards will be given priority. Each issue has the cover story highlighting the significance of a selected article published in the issue. At the end of each quarter, the JCR editors select "The Editors' Choice" from the published research articles.
