Cover Story
Intracellular enzymes of the retinal pigment epithelial cells for controlled drug delivery
K. Park (West Lafayette, USA) 102

Reviews
Microneedle, bio-microneedle and bio-inspired microneedle: A review
G. Ma and C. Wu (Dalian, China) 11

Nanodrug delivery systems for targeting the endogenous tumor microenvironment and simultaneously overcoming multidrug resistance properties
R. Li and Y. Xie (Shanghai, China) 49

Solvent removal precipitation based in situ forming implant for controlled drug delivery in periodontitis
S. Jooekar and H. Kathpalia (Mumbai, India) 75

Research papers
Modality of tumor endothelial VEGFR2 silencing-mediated improvement in intratumoral distribution of lipid nanoparticles
S. Yamamoto, A. Kato, Y. Sakurai, T. Hada and H. Harashima (Japan) 1

Dual-ligand α5β1 and α6β4 integrin targeting enhances gene delivery and selectivity to cancer cells
R.M. Levine and E. Kokkoli (Minneapolis, USA) 24

Differentially cleaving peptides as a strategy for controlled drug release in human retinal pigment epithelial cells
M. Bhattacharya, S. Sarkhel, J. Peltoniemi, R. Broadbridge, M. Tuomainen, S. Auriola and A. Urtti (Helsinki, Kuopio, Finland; Hampshire, UK) 37

Multiply repeatable and adjustable on-demand phototriggered local anesthesia
A.Y. Rwei, C. Zhan, B. Wang and D.S. Kohane (Boston, Cambridge, USA) 68

Aptamer-based liposomes improve specific drug loading and release
R. Plouneur, B.M. Derhal, A. Dresosiers, C. Dussart, A. Vallée-Bélisle and J. Leblond (Canada) 82

Delivering adjuvants and antigens in separate nanoparticles eliminates the need of physical linkage for effective vaccination
M.O. Mohsen, A.C. Gomes, G. Cabral-Miranda, C.C. Krueger, F.M.S. Leoratti, J.V. Stein and M.F. Bachmann (Oxford, UK; Doha, State of Qatar; Bern, Switzerland) 92

Erratum
Erratum to 'Combining different types of multifunctional liposomes loaded with ammonium bicarbonate to fabricate microneedle arrays as a vaginal mucosal vaccine adjuvant-delivery system (VADDS)' [J. Control. Release 246 (2017) 12–29]
N. Wang, Y. Zhen, Y. Jin, X. Wang, N. Li, S. Jang and T. Wang (Hefei, Beijing China) 101

Graphical Abstracts Contents Listing doi: 10.1016/S0168-3659(17)30132-3 e1

journal of controlled release

The Journal of Controlled Release (JCR) publishes high-quality research articles in the broad field of delivery science and technology. This includes drug delivery systems and all aspects of formulations, such as physicochemical and biological properties of drugs, design and characterization of dosage forms, release mechanisms, in vivo testing, and formulation research and development in the disciplines of pharmaceutical, diagnostic, agricultural, environmental, cosmetic, and food industries. Manuscripts that advance fundamental understanding of principles and/or demonstrate advantages of novel technologies in safety and efficacy over current clinical standards will be given priority. Each issue has the cover story highlighting the development of a selected article published in the issue. At the end of each quarter, the JCR editors select "The Editor's Choice" from the published research articles.
